Entry Level ServiceNow Application Developer

To apply: please use the following link: tsi.hire.skillsnow.com/apply/1268

Location: New York (East Coast)

Travel: Must be willing to travel to client sites throughout the US

Salary: \$35k in Training for 8 weeks rising to \$70k once working on internal projects and a guaranteed pay raise after 12 months

Start date: May 27th, 2025

About us:

NETbuilder is a leading provider of digital solutions, software, consulting and managed services. We work across multiple sectors, with specialist expertise in the financial services industry.

At our core, we are a Digital Transformation consultancy with capabilities for onsite, onshore and offshore. You will join a world class team of experienced, successful professionals.

Overview:

As a ServiceNow Developer you will play a key role in configuring new and existing environments. You will be a technical designer for ServiceNow code and architecture.

You will undergo up to 8 weeks of remote paid training delivered by our Industry expert trainers. This training will equip you with the skills needed to become an ServiceNow Developer.

Personal attributes:

Passionate about technology, technical development, and engineering solutions
A proactive approach to problem-solving
Excellent analytical and problem-solving skills
Self-sufficient
Good communications skills - written and verbal
Ability to engage and interact with non-technical staff
Consultative and highly communicative with peers
A good team-playing mentality
An ability to work to tight deadlines and within constraints
You'll also

Be a technical designer and developer for ServiceNow code and architecture, responsible for ServiceNow code quality
Design, prototype, implement, test, and deploy business rules, technical solutions, such as client scripts, UI pages/actions/policies, scheduled job, import sets and
Develop custom integration components (e.g. REST API[GH3]) and integrate legacy systems with ServiceNow using mid-server, web services, security tools, email and other
Create and use update sets to move customizations between ServiceNow instances
Design for and maintain a highly available and recoverable environment
Provide administrative ServiceNow support, including advanced support via troubleshooting, implementing bug fixes and root cause analysis
Commit to the continuous improvement and learning of development and ServiceNow best practices, tools and technology
We'd like to hear from you if you:

Enjoy problem-solving, have plenty of initiative and a flair for creating solutions
Are a quick learner of new concepts
Work well in both team and independent settings
Thrive in a process-driven environment with excellent attention to detail
Offer ideas for change and improvement
Are adept at building rapport with diverse individuals
Share our passion and aptitude for technology and education
Have a strong technical proficiency in JavaScript
Have advanced mathematical skills
Ideally have a STEM degree with a GPA 3.1 or above, especially in Computer Science, Software Engineering, Electrical/Electronic Engineering, Physics or Maths
What you will get from us:

Alongside a great cultural environment and reward scheme at NETbuilder, we highly value your career progression, where personal development is at our core, and everyone has a guaranteed pay rise after 12 months
\$35k in Training for 12 weeks rising to \$70k once working on internal projects and a guaranteed pay rise after 12 months
Internal continuous training and development
