CLOCKWORK.iO

Software Engineer

⊙ On Site, Palo Alto, California

[Clockwork.io](#) is a Silicon Valley startup that delivers state-of-the-art AI compute acceleration.

We are founded by Stanford researchers and veteran systems engineers with a shared belief: distributed systems powering modern AI require a new approach to managing time, reliability, and performance. Unlike traditional solutions that rely on specialized hardware or embedded telemetry in switches, Clockwork's system brings insane visibility, resilience, acceleration and efficiency to the network layer entirely through software. As AI workloads continue to scale in size, urgency, and impact, networks must evolve to keep up. Clockwork exists to make that evolution possible.

We are currently seeking bright, versatile software engineers who will design the next generation of network acceleration software. Stay a nanosecond ahead of everyone else by joining our team in California!

What you will do

Use your coding skills and distributed system knowledge to contribute directly to the design and build of high performance, reliable and scalable systems.

Enjoy

- Challenging projects.
- Competitive compensation.
- A great benefits package.
- Catered lunches.
- A friendly and inclusive workplace culture.
- Working in the heart of Silicon Valley.

You bring

- A degree in computer science, electrical engineering or related field.
- Fluency in at least one of the following languages: C, C++, Golang, Java, Python.
- Excellent communication skills.
- Excellent debugging and problem solving skills.

You also have one or more of these skills

- Operating systems expertise (e.g. threads, scheduling, process sync, kernel programming).
- Computer networks expertise (e.g. networking stacks and protocols, queuing theory, congestion control).
- Experience designing, building and deploying large-scale distributed systems.

- Full-stack development experience.

Clockwork is assembling world class teams to build cutting edge software. We look for bright people from all walks of life and we grow together. All qualified applicants will receive consideration for employment without regard to race, color, ancestry, religion, age, sex, sexual orientation, gender identity, national origin, or protected veteran status and will not be discriminated against on the basis of disability.
